Activity Report '08-'09: The DLA Continuing Education Committee scheduled 2 free training sessions on the topics of locating mental health information for patrons and complementary/alternative medicine resources. These trainings were offered by the National Networks of Libraries of Medicine Middle Atlantic Region. Originally scheduled for March 4th at the Delaware Division of Libraries, the training was cancelled due to lack of interest. Discussions are continuing with the instructor, who has offered to create a web-based version of the training for librarians in the state.
